# Connecting to DNS Made Easy

We assume you've already created an account for DNS Made Easy (https://dnsmadeeasy.com/)and you are logged in.

1. Go to Config > Account Information.

2. Copy your "API Key" and "Secret Key".

3. Go to your DNS Manager plugin settings screen.

4. In your network admin screen, navigate to DNS Manager > Settings and click the DNS Provider tab.

5. Select DNS Manager as DNS Provider.

6. Enter your "API Key" and "Secret Key".

7. Click "Save Settings".

8. A modal pop-up window will appear asking you to copy and paste a line of code into your wp-config.php file. This must be done via FTP.

9. One done, click the Check Key button and if everything is ok, you can click the OK button.

If you'd like to learn how to setup DNS Manager with custom nameservers, continue to the article: Setup DNS Manager with Custom Nameservers
